

Data/Business Intelligence Analyst - #222588

Location: CA-Folsom, IA - Des Moines

Disruption leads to innovation.

With data, we better understand our customers – how they think, live and work. But understanding is only the first step. Our teams use data to drive and transform decision making across the enterprise.

Enjoy working with a wide variety of data and interacting on a dynamic team? Consider expanding your data skills as a Data and Business Intelligence Analyst with our Principal Global Investors US Wealth Advisor team.

As an Analyst, you'll partner closely with our sales and marketing teams providing critical data integration support to help uncover new opportunities and strategies. And because business intelligence is ever changing in this role, you'll work with a wide variety of data and solve important business problems.

Areas you'll be exploring include but is not limited to:

- Data Stewardship
- Data Mining
- Analysis
- Statistical Modeling

Qualifications:

- Bachelor's degree in Statistics, Business Analytics or equivalent experience required
- 1+ years of related work experience with analytics.
- Knowledge of working with large databases and visualization tools (SAS70, Power BI, etc.).
- Excellent problem-solving, analytical, math, and statistical skills and demonstrates the ability to identify and resolve complex problems.
- Ability to understand the importance of definitive data and the ability to persist in ensuring the appropriate source.
- High degree of commitment to quality deliverables.
- Excellent organizational skills and ability to manage multiple projects with varying priority.
- Strong interpersonal skills, including verbal and written communication and being a team player.
- Ability to maintain confidentiality.
- Knowledge of company business unit products, customers, and investment knowledge.
